Sprawling more than 68,000 acres behind the protection of the Gulf of Mexico shoreline, **St. Andrew Bay** is home to abundant aquatic life. The bay spans more than 20 miles and includes a wealth of saltwater flats and seagrass beds that offer a rich bounty. Redfish, speckled trout, black drum, cobia, sheepshead, and flounder are just a few of the species populating these channels. The clear waters of this extensive ecosystem are ideal for both novice and expert anglers.

Hire an experienced fishing charter service to take you out to the best spots where the fish are plentiful. Numerous charter boat captains can arrange for inshore and offshore fishing year-round or even guide you on a scuba or snorkeling excursion. Bottom fishing yields grouper, snapper, mahi-mahi, mackerel and amberjack. Trolling is an ideal method for hooking both Spanish and king mackerel, while sport fishing for sailfish and marlin provides heart-thumping excitement and a true test of endurance and skill.
